

How to order a Four Eye Hose Restraint

For a **Four Eye Hose Restraint** to effectively control a hose failure it's important to supply the correct measurements.

When ordering a **Four Eye Hose Restraint** there are 3 key points that need to be met for us to manufacture the Hose Restraint correctly for you:

- Hose Outside Diameter (OD) in mm
- Both Eye Lengths as shown in the diagram below
- Overall Length (commonly referred to as the "Shackle point to Shackle Point measurement")
